🏠 No. 258, Carina Estate, Jalan Stapok Utama, 93250 Kuching, Sarawak

PROFILE

A passionate Software Engineer with experience in full-stack web development at a geotechnical company, focused on developing a web-based Borehole Log System (IDMS). Contributed to centralizing borehole data and streamlining the collection, review, and preparation of borehole logs for both office and field operations. Experienced in internal performance optimization projects and building scalable solutions on Google Cloud Platform (GCP).

Holds a First-Class Honours Bachelor's Degree in Software Engineering (CGPA 3.73) from UNIMAS, with a strong passion for writing clean, efficient, and reliable code.
