No. 258, Carina Estate, Jalan Stapok Utama, 93250 Kuching, Sarawak

PROFILE

A passionate Software Engineer with experience in full-stack web development at a geotechnical company, focused on developing a web-based Borehole Log System (IDMS). Centralized borehole data and streamlined collection, review, and preparation processes for office and field operations. Experienced in internal performance optimization projects and building scalable solutions on Google Cloud Platform (GCP). Holds a First-Class Honours Bachelor's Degree in Software Engineering (CGPA: 3.73) from UNIMAS, with a strong passion for writing clean, efficient, and reliable code.

TECHNICAL SKILLS EXPERIENCE

- Enhanced web systems using PHP
- Conducted system review sessions with clients

Project: Recruitment System

Sales Executive cum Technician Assistant

Compuway Marketing Sdn. Bhd.

| December 2018 - July 2019 | February - April 2017

- Promoted sales of computers and accessories
- Assembled customized computers
- Repaired computers and laptops

EDUCATION

Bachelor of Computer Science with Honours (Software Engineering)

Universiti Malaysia Sarawak | 2019 - 2023

Scholarship: Yayasan Sarawak Tun Taib Scholarship

CGPA: 3.73 (First Class Honours)

Dean's List Award:

2019/2020 Semester 2 (YEAR 1) to 2022/2023 Semester 2 (YEAR 4)

Final Year Project (FYP)

Project Title : Smart Shopping Cart Calculator Using Barcode Scanner with Arduino
Project Description : Designed a device that automatically totals scanned item prices in real time, helping users track spending and prevent overspending.

Skills Used : Arduino, PHP, MySQL, Bootstrap
Paper : <https://doi.org/10.37934/araset.49.1.117128>
